CargoWise Master Data Upload & Migration Tool Suite (Excel to XML)

What is CargoWise Master Data Migration Tool?

The CargoWise Master Data Migration Tool simplifies the transfer of master data by converting Excel inputs into structured XML with built-in validation. By reducing errors and supporting bulk uploads of key records such as organizations, rates, and vessels, it helps make system implementation smoother and more efficient.

Benefits and Target Customers

- **Simplifies data entry and migration using Microsoft Excel's familiar capabilities.**
- **Built-in validation reduces errors** before upload, saving time during implementation.
- **Supports bulk** uploads across multiple companies, streamlining setup and expansion.
- Helps ensure **smoother CargoWise implementation** by minimizing manual work and rework.

Target customers include customs brokers, importers/exporters, freight forwarders, and shipping brokers/NVOCC.

List of Functions

- Convert & Uploading **Organization Data***
- Convert & Uploading **Rates Data including Company Tariff, Client Rates and Costing**
- Convert & Uploading **Vessel Data, Location Data including warehouses, ports, and branches**

Charge Codes and GL csv upload tool are available in CargoWise.

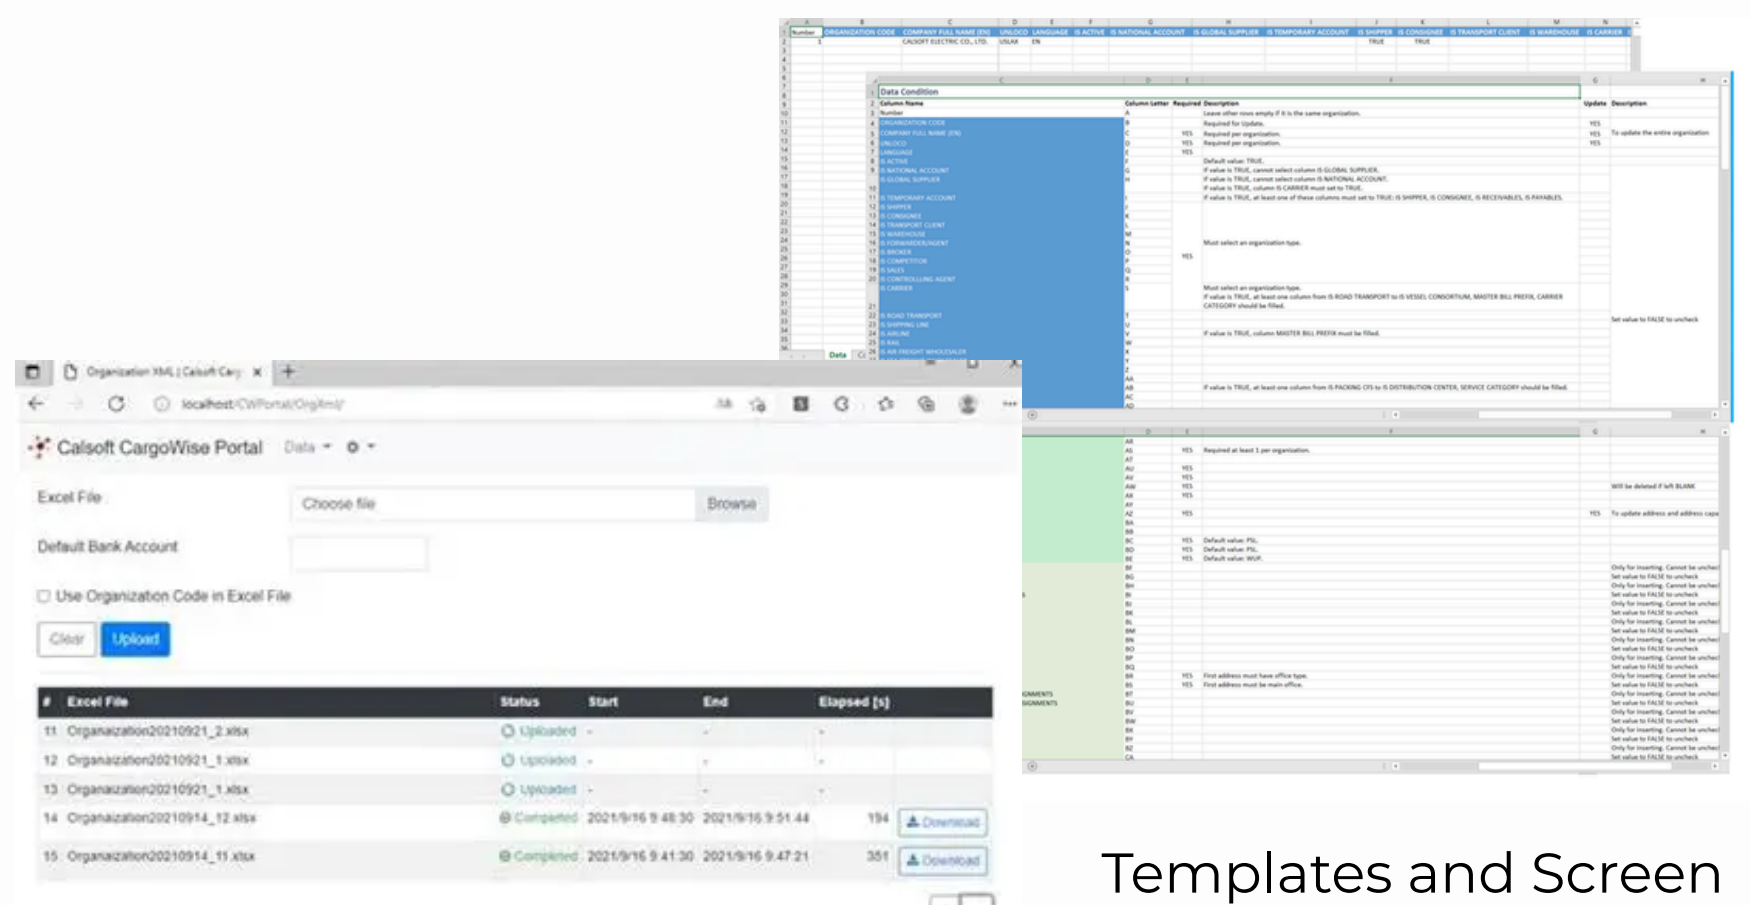

* CargoWise out-of-box organization tool only handle basic info like company names, addresses, organization codes etc. Calsoft web tool handle any organization data with unique requirements.
